SAFER LOCKS

SAFER AUTOMATIC WHEELCHAIR WHEEL LOCKS

Safer Locks is a patented, auto-engaging wheelchair wheel lock, designed to prevent wheelchair users from falls and injuries caused by unexpected chair roll due to unsecured manual wheel locks.

SAFER LOCK FEATURES

- ✓ Add to an existing wheelchair or purchase a new chair with locks installed
- ✓ Automatic operation is ideal for those with cognitive disorders
- ✓ Chair wheels are always locked when empty*
- ✓ Override handles allow for rolling the wheel-chair while empty*
- ✓ Wheels are always locked when sitting into, or standing from wheelchair
- ✓ Positive Locking: No backward or forward roll
- ✓ Chair continues to operate as normal and can still be folded

WHY CHOOSE SAFER LOCKS?

Because most falls and injuries from wheelchairs could easily be prevented by using Safer Locks.

Wheelchair falls most commonly occur due to the chair user or caregiver simply forgetting to engage the manual wheel locks.

Safer Locks will give wheelchair users, caregivers, and their loved ones, the peace of mind in know-ing that the wheelchair will always be locked in place every time that transfers take place.
